

## PRESS RELEASE

### **PPA S.A.: Completion of Emergency Drill for Pollution Incident Response at the Port of Piraeus**

**01 December 2025.** Piraeus Port Authority S.A. (PPA S.A.) carried out, once again this year, in the central Port and specifically in the Ferry Terminal (Gate E7), an emergency drill for responding to incidents of marine and land pollution.

The primary purpose of this drill was the knowledge enhancement and the acquisition of specialized experience, both by the staff of PPA S.A. and by the port users, for the effective activation and implementation of the Marine and Land Pollution Response Plan. Additionally, during the execution of the drill, the available and fully operational equipment used for responding to pollution incidents was demonstrated. The drill was conducted in collaboration with PPA S.A.'s specialized contractor responsible for the implementation of the "ANTIPOLLUTION ANE" Plan, and in the presence of the competent Hellenic Coast Guard.

It is emphasized that environmental protection and the adoption of preventive measures constitute a fundamental pillar of the strategy on the basis of which the company implements the plan for the further modernization and development of the Port of Piraeus. In this context, PPA S.A. carries out numerous environmental projects and initiatives that contribute to the prevention of environmental incidents and to the formation of an overall preventive approach to contemporary environmental challenges.

The CEO of PPA S.A., Mr. Su Xudong, expressed his sincere gratitude to the staff for the proper and successful completion of the drill, emphasizing that continuous and systematic preparation constitutes a fundamental factor for the effective management of potential emergency incidents. As he noted, targeted training and regular exercises create the necessary conditions for immediate response and a high level of operational readiness.

Furthermore, Mr. Su Xudong highlighted that the Port of Piraeus is developing with absolute commitment to the principles of sustainability and environmental protection, consistently shaping the conditions to become a modern, competitive, and exemplary green port.

Following the conclusion of the drill, a special evaluation report is prepared, recording the results obtained from its execution, as well as any areas for improvement to achieve the highest possible level of operational readiness.

---

#### About PPA S.A.

Piraeus Port Authority SA is an Athens Stock Exchange listed company engaged in the management and operation of Piraeus port, Greece's largest port and one of the largest integrated harbours in Europe, providing a complete range of services. Some of the company's activities involve cruise, coastal (ferry/passenger), container and car terminal services, as well as general cargo, ship repair, logistic and free zone services. The main shareholder of Piraeus Port Authority S.A., with a stake of 67 percent, is COSCO SHIPPING, one of the largest maritime companies in the world. Over the last decade the company has experienced a remarkable growth in all port activities, which is still underway, largely contributing to the country's economy, while driven by green development and increased digitalization, alongside a people-first approach and a spirit of giving back to the society. PPA is a member of "ECO PORTS", holds ISO 9001:2015, ISO 14001:2015, ISO 50001:2018 Certifications, is included in the Athens Stock Exchange ESG index and is one of the "Most Sustainable Companies in Greece 2025".
